

Wilfa by Hurom ANDANTE

This machine is the result of a collaboration between two companies with a passion for tasty, nutritious and fresh home made juice.

Slow Squeezing Technology SST™

Hurom's exclusive grinder works just like a manual citrus juicer, but with more pressure – it gently squeezes the juice out of fruits, vegetables, nuts, and grains – without damaging the vital nutrition, color, and flavor. No sharp edges, no whirring blades. Just pure nutritious deliciousness, straight into your glass.

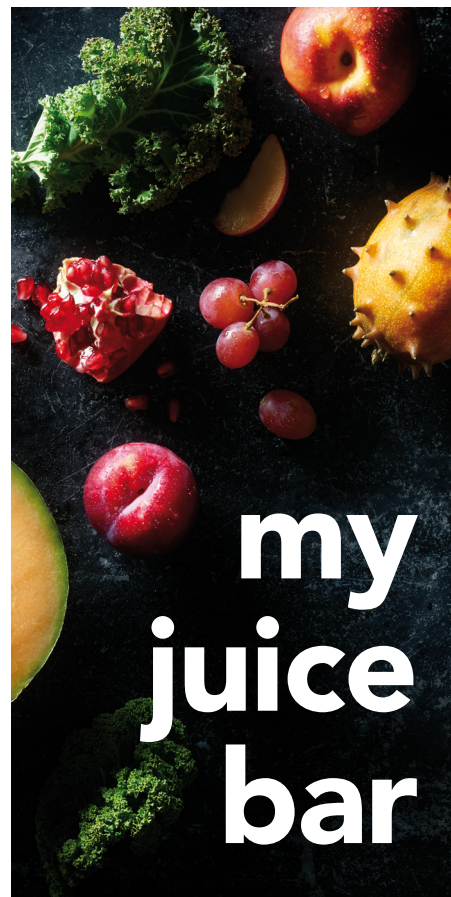

Carrot juice by
fine- and coarse strainer:

Pulp control lever:

Closed lever gives you less pulp out, more pulp in the juice and more fiber in the juice.

Open lever gives you more pulp out, less pulp in the juice and less fiber in the juice.

ANDANTE slow juicer

SJWH-21S

- 150W/43Rpm
- BPA free
- Grinder made of Ultem
- 2 strainers – fine and coarse
- Drip stop
- Very quiet motor
- Easy to clean
